

This leaflet contains the quick start guide and warranty information. The full manual is available online at:

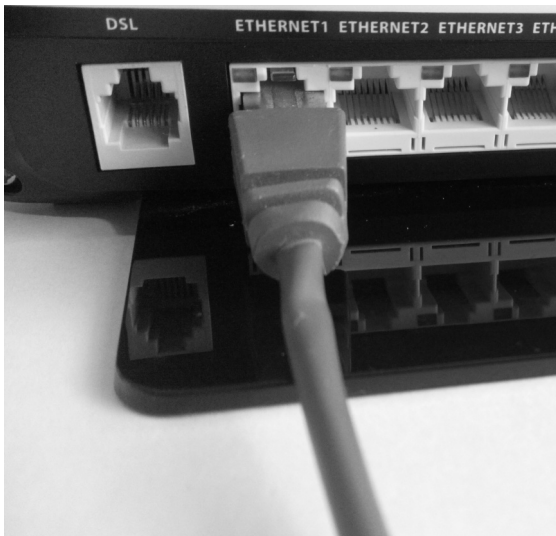

<https://www.invizbox.io/manual.pdf>

Start Here

1) Connect the supplied ethernet cable to the WAN port on the InvizBox as shown below.

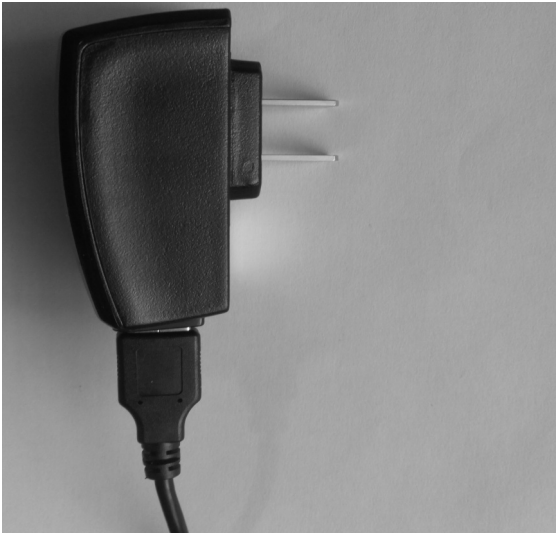

2) Connect the other end of the ethernet cable to an ethernet port on the router given by your internet service provider. An example is shown below.

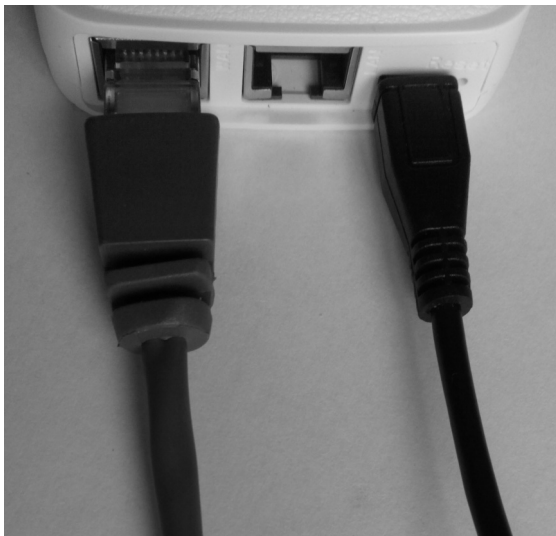

3) Connect the USB cable to a suitable power source. An example is shown below.

(Note: Many routers now have suitable USB ports which can be used instead of a separate power supply)

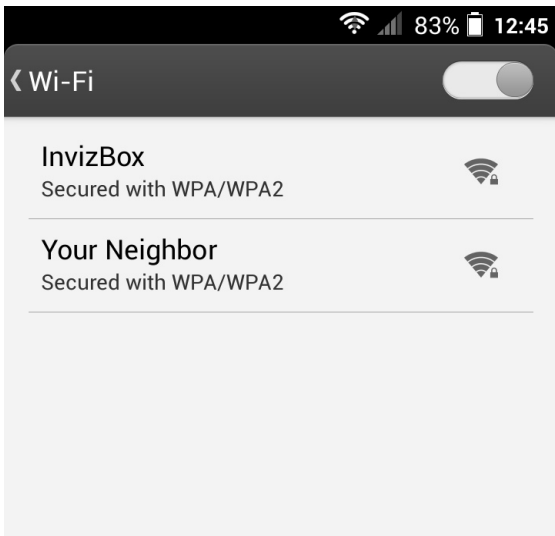

4) Connect the other end of the USB cable to the InvizBox.

5) Wait about 30 seconds for first boot. If you are using wifi, look for an "InvizBox" wifi access point.

Note: An android screen is shown below. Yours may differ slightly.

6) Select the InvizBox wifi access point and enter the password that is printed on the bottom of your InvizBox.

Note: An android screen is shown below. Yours may differ slightly.

7) That's it! You are connected to the Tor network. To verify, open your browser and go to: <https://check.torproject.org> and you should see a page like this:

**Congratulations.
This browser is
configured to
use Tor.**

Warranty

The warranty obligations of InvizBox Ltd. for this product are limited to the terms set forth below:

What is covered:

This limited warranty covers defects in materials and workmanship in this product for a period of 12 months from the date of shipping of this product.

What is Not Covered:

This limited warranty does not cover any damage, deterioration or malfunction resulting from any alteration, modification, improper or unreasonable use or maintenance, misuse, abuse, accident, neglect, exposure to excess moisture, fire, improper packing and shipping (such claims must be presented to the carrier), lightning, power surges, or other acts of nature. This limited warranty does not cover any damage, deterioration or malfunction resulting from the installation or removal of this product, any unauthorized tampering with this product, any repairs attempted by anyone unauthorized by InvizBox Ltd.

What is Not Covered (contd.) :

Any attempt to alter the functionality of the InvizBox beyond it's original use will render this warranty void. This is to include (but not limited to) any remote shell based access to the router to perform tasks not directly authorised in writing by InvizBox Ltd. In short, if you use a shell over SSH (or any other medium) and break things, it's your own fault and we wont be held responsible. We will probably help you anyway, because we're nice like that.

Any attempt to put a firmware on the InvizBox that is not directly authorised by InvizBox Ltd. will render this warranty void.

Who is covered:

Only the original purchaser of this product is covered under this limited warranty. This limited warranty is not transferable to subsequent purchasers or owners of this product.

Returns under warranty:

The cost of return to InvizBox will be borne by the purchaser. If your return is within warranty and the defect has not been caused by user damage there are no handling charges for the repair and subsequent return to the purchaser. If the defect is not covered under warranty (e.g. where there is a fall/impact or water damage, improper use or that the product is outside the manufacturer's warranty) we will send you a quotation for repairs.

You can choose whether you agree with the repair (at the specified amount) or refrain from further settlement. In the latter case, your product will be sent back to you with a bill for any research and / or transport costs.
